SUMMARY

A Tech enthusiast and Junior Software Developer with experience in front-end and back-end development. Possesses a strong portfolio showcasing expertise in building React apps and working with APIs. Eager to learn and passionate about front-end technologies, with a focus on delivering effective and result-driven solutions to business needs. Utilizes theoretical knowledge, personal experience, and certifications to contribute to the success of any software development team.

EXPERIENCE

Cook
Rose Cafe   **July 2020 - Present, Sydney, Australia**
• Demonstrated ability to work in a fast-paced environment, prioritizing tasks and ensuring timely delivery of high-quality products, which translates to being able handle multiple projects and deadlines as a software developer.
• Collaborated with other kitchen staff to ensure smooth and efficient service, demonstrating the ability to work well within a team and communicate effectively, which is crucial for working collaboratively with other developers.
• Developed and executed menus in accordance with dietary needs and customer preferences, which translates to being able to understand and meet user requirements as a software developer.

Jr Front-End Web Developer
Creative Techno Solutions   **January 2018 - July 2018, Dang, Nepal**
• Worked closely with team leader and learned new web development tools and technologies.
• Designed website using HTML, CSS and Bootstrap.
• Worked with front-end team in building and maintaining e-learning content.

PROJECTS

DBS (Consulting Website)
Personal Project • February 2023 - Present

• Developed a consulting website for a client using a ReactJS framework.
• Designed and implemented a visually appealing, responsive and user-friendly website.
• Utilized modern web development tools such as Webpack and Babel to bundle and convert code more effectively.
• Hosted the website on Netlify with GitHub integration, and configured continuous deployment for automatic updates to live website.
• Created reusable react components and followed best practices to ensure maintainability and scalability of the codebase.
• Worked independently to troubleshoot and resolve any hosting or deployment issues.

AI Image Generator
Personal Project • December 2022 - Present

• Developed an AI image generator using Vanilla JavaScript and the Open AI API.
• Utilized the Open AI API to generate custom images based on user input.
• Configured API requests to retrieve generated images based on user input.
• Utilized personal initiative to understand the capabilities and limitations of the Open AI API, and incorporated this knowledge into the project design.

RekognizeMe (Object Identification App)
Personal Project • July 2021 - October 2021

• Designed and developed and Android app in Java with Google Machine Learning (ML) Kit.
• Utilized Firebase ML Kit for image labeling to detect and extract information about the objects in an image.
• Implemented SerpApi to access Google search results of the object identified in the image.

EDUCATION

Bachelors in information technology (Specialized in Software Development)
Charles Sturt University • Sydney, Australia • 2021

CERTIFICATIONS

Web Developer Bootcamp
Udemy • 2022
64 total hours Full Stack Web Development Bootcamp

SKILLS

HTML5 & CSS, JavaScript, Bootstrap, ReactJS, DOM, Redux, Styled-Components, JSX, Express, NodeJS, MongoDB, APIs, Java, Git, Visual Studio Code, Android Studio
